

CV DR. LEOCADIO RODRIGUEZ MAÑAS

Head of the Department of Geriatrics at Hospital Universitario de Getafe (Madrid), Professor of Geriatrics at the Universidad Europea de Madrid, Coordinator of the Spanish Collaborative Research Network on Aging and Frailty - RETICEF (Ministry of Science and Innovation), and Co-director of the Toledo Study on Healthy Ageing, carried out on 2.895 community-dwelling older people.

Principal Investigator in several research EU-funded projects focused on frailty: FOD-CC, aimed to find a clinical definition of frailty; MID-FRAIL to test the efficacy of a multimodal intervention in prefrail/frail older patients with type 2 diabetes; FRAILOMIC with the aim of knowing the usefulness of “omics” in the diagnostic and prognosis of frailty; FRAILCLINIC to assess the effectiveness of a liaison geriatric team in the management of frail older patients admitted to the Hospital out of the Geriatric Department and FRAILTOOLS to assess the performance of the most used diagnostic tools of frailty in different clinical settings. In addition he is participating in other EU-funded projects and since 2016 is leading the European Joint Action on Frailty Prevention.

Prof. Rodriguez-Mañas has published original manuscripts in peer reviewed journals, books and book chapters and has participated in performing Technical Reports on several aspects of ageing, frailty and diabetes in older people for both national (Ministry of Health, Scientific Societies, Research Bodies and Agencies) and international (WHO, PAHO, DG-SANCO, DG-Research, IAGG, etc) organisms.
